

INNOVATIVE MODULAR BUILD SOLUTIONS
FOR THE GLOBAL ENERGY SECTOR

CONSAFE HAS OVER THIRTY YEARS EXPERIENCE IN PROVIDING BESPOKE MODULAR SOLUTIONS TO THE DEMANDING INTERNATIONAL ENERGY INDUSTRY.

From living quarters to utility and process buildings, the energy sector is particularly demanding when it comes to **safety** and reliability where the module must be engineered to withstand the rigours of operational life.

Our products and service range has grown to meet new challenges in an evolving industry where our proactive staff deliver innovative, fit for purpose modules to the **highest quality standards**.

SAFETY IS OUR FIRST MEASURE OF SUCCESS AND UNDERSCORES THE MANNER IN WHICH BOTH IN-HOUSE AND CLIENT KNOWLEDGE AND EXPERTISE IS APPLIED THROUGHOUT EVERY CONSAFE PROJECT.

For your common areas, we deliver tailored comfort and style through ergonomically advanced and optimised solutions founded on durability, flexibility and maintainability.

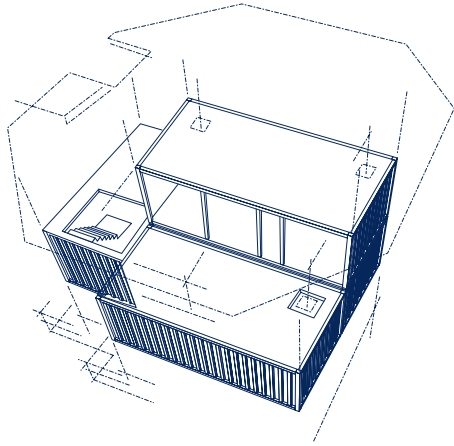

Our effective and efficient use of space is achieved without compromise to the highest standards of safety, style and comfort - a unique balance between space and functionality.

Our designs serve all your potential operational demands and satisfy all health, hygiene, safety, environmental and maintenance standards and requirements.

SAFETY EXCELLENCE, HIGH QUALITY STANDARDS, PROACTIVE SOLUTIONS

THE MODULAR BUILD APPROACH ENCOURAGES RESPONSIBLE AND INNOVATIVE THINKING IN FRONT-END ENGINEERING. WHERE OTHER DESIGN TEAMS MAY BE RESTRICTED BY CONVENTIONAL TECHNIQUES, CONSAFE WILL DEVELOP FRESH TECHNOLOGICAL SOLUTIONS TO SPACE, WEIGHT AND DELIVERY CHALLENGES.

We design, engineer, manufacture and test the majority of our modules remotely, for the ultimate destination, accelerating production, **delivering safer off-site inspection and commissioning**, ensuring the safety of project workers whilst maximising efficiency.

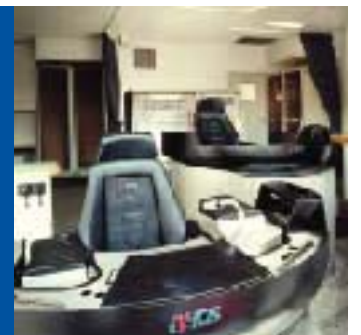

- ❑ MODULAR BUILD PROMOTES A COMMON APPROACH IN FUNCTIONAL DESIGN
- ❑ ENCOURAGES CONTINUITY OF RESOURCE THROUGH SEAMLESS PROCUREMENT PROCESSES
- ❑ DEVELOPS SAFE AND EFFICIENT FAST TRACK CONSTRUCTION TECHNIQUES

For specialist modules and units, we exploit our expertise, innovation and in-depth industry knowledge in delivering tailored and specialised solutions.

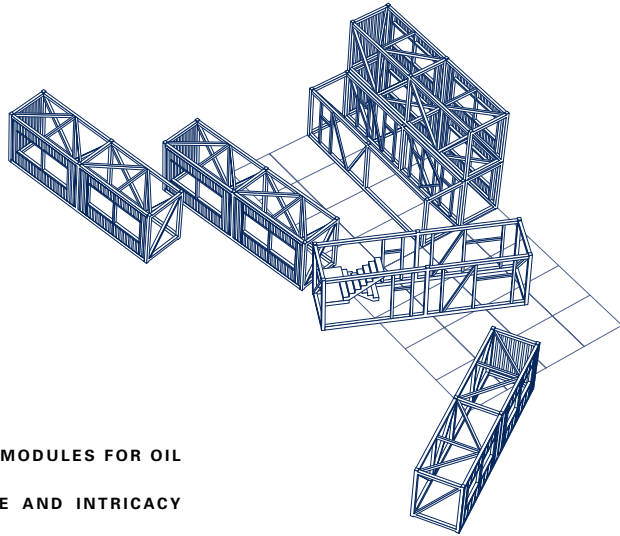

Our specialists design and manufacture modules unique to the functional demands of your operation and the space, weight and safety restrictions of your environment.

With a strong focus on ergonomics, style and comfort, it is durability, functionality and practicality that are the outstanding hallmarks of our specialist designs and products.

ACCELERATED SCHEDULE, REDUCED WEIGHT, ENHANCED FLEXIBILITY

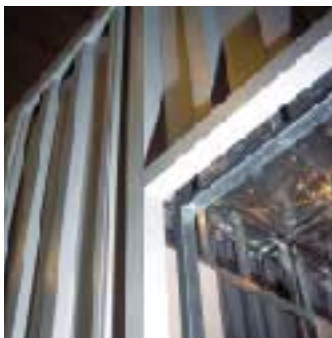

CONSAFE HAS PRODUCED OVER FIVE THOUSAND MODULES FOR OIL AND GAS INSTALLATIONS. THEY RANGE IN SIZE AND INTRICACY FROM INDIVIDUAL LABORATORY MODULES TO MULTI-STOREY ACCOMMODATION COMPLEXES.

Our engineering and construction facilities support all offsite modular manufacturing. Multi-disciplined resources collaborate to ensure all custom-built and standard modules conform to **health, safety and environmental standards**, address structural and ergonomic parameters and offer a cost-effective, versatile, single-source solution to accommodating people, plant and processes.

- ❑ EXTENSIVE MODERN FACILITIES FOR LARGE SCALE MANUFACTURING
- ❑ ON-SITE COMMISSIONING, LOAD-OUT AND INSTALLATION MANAGEMENT
- ❑ RAPID GLOBAL DELIVERY AND AFTER-SALES SERVICE NETWORK

All modules and units are fully finished at our production facilities, minimising installation effort at location and allowing clients full off-site inspection before shipment.

After construction, our logistics team manages the safe and timely delivery of your modules through our extensive transportation network, via road, rail and sea.

Once on-site, our specialists assist in the safe and effective load out, installation and tie-in of your modules, providing our continuity of support from design to installation and operation.

INHOUSE INNOVATION, OFFSITE INTERPRETATION, TOTAL INTEGRATION
